Professional Summary

AI & DS undergraduate with a strong interest in machine learning and real-world application development. Possess foundational knowledge of Python, SQL, and frameworks like Django and Streamlit, with hands-on project experience in data analysis and web-based solutions. Developed projects focusing on practical and user-centric solutions.

Education

- Guru Jambheshwar University of Science & Technology — Hisar, Haryana
  BSc CS(AI & DS), 8.89 CGPA — September 2024 – June 2028
- Govt. Sr. Sec. School — Balak, Hisar
  12th, 87% — April 2023 – March 2024

Technical Skills

Languages : C, C++, Python, SQL, JAVA
Frameworks & Libraries : Tkinter, NumPy, Pandas, Matplotlib
Frontend : HTML, CSS, JavaScript, Streamlit
Backend : Django
Tools & Platforms : Excel, Git, GitHub, VSCode, Google Collab, Jupiter Notebook, Ecllipse
DataBase : MySQL, Firebase
Cloud : Amazon Web Services (AWS), Google Cloud
Additional : Data Structure Algorithm (DSA), Object Oriented Programming (OOP)

Soft Skills

Team Management, Project Management, Problem Solving, Communication, Debugging

Projects

Interactive Data Preprocessing & Visualization : *Github* - *Link* — July 2025 – Sep 2025

- An interactive web app for data preprocessing, visualization, and structured dataset export.
- Implemented CSV/XLSX upload (up to 200MB) with real-time preview and preprocessing features.
- Also statistical visualizations and enabled clean dataset export for analytics and machine learning workflows.
- **Tech Stack** : *Python, Pandas, Streamlit, Matplotlib*

Account Spent : *GitHub* - *Link* — Nov 2025 – Jan 2026

- Account Spent is a Streamlit web app that helps users manage their finances by tracking income and expenses in real time.
- It uses Firebase for secure user authentication and cloud data storage via the Realtime Database.
- Users can categorize, add, and reset their income and expenses, and visualize spending patterns through interactive bar charts and also download CSV a report, which makes it easy to review and share financial data.
- **Tech Stack** : *Python, Streamlit, Pandas, Matplotlib, Firebase*

Crop Recommendation : *GitHub* — Feb 2026 – Present

- Developed a Crop Recommendation System using Django, implementing user authentication and an admin dashboard for efficient data management.
- Built a machine learning model using the Random Forest Classifier, trained on Kaggle datasets to provide accurate crop predictions based on input conditions.
- **Tech Stack :** *Python, Django, Random Forest Classifier, SQLite, Kaggle, HTML, BootStrap CSS*

Certificates

Hands On Workshop On Linux | *Certificate*

- Completed a hands-on workshop on Linux, gaining practical experience with commands, Virtualization, and Cloud Computing.

Achievements

Smart India Hackathon | *Certificate*

- Cleared Internal Smart India Hackathon (SIH) and developed a real-time Traffic Management System with priority-based signal control and waiting time optimization.

Monthly Coding Test | *Certificate*

- Achieved 3rd position twice in MCT, showcasing strong problem-solving skills and consistent performance in a competitive environment.

Coding Contest | *Certificate*

- Achieved 3rd position in Coding Contest, sponsored by Haryana State Council for Science Innovation & Technology (HSCSIT, Panchkula.

Debugging Contest | *Certificate*

- Achieved 2nd position in Debugging Contest sponsored by Haryana State Council for Science Innovation & Technology (HSCSIT, Panchkula.
