Email : nidhireddu2810@gmail.com

Professional Summary

AI & DS undergraduate with a strong interest in Machine learning and real-world application development. Possess foundational knowledge of Python, SQL, and frameworks like Django and Streamlit, with hands-on project experience in data analysis and web-based solutions. Developed projects focusing on practical and user-centric solutions.

Education

- Guru Jambheshwar University of Science & Technology — Hisar, Haryana
  BSc CS(AI & DS), 8.81 CGPA — September 2024 – June 2028
- Govt. Sr. Sec. School — Balak, Hisar
  12th, 87% — April 2023 – March 2024

Technical Skills

Programming Languages : C, C++, Python, SQL
Frameworks & Libraries : Django, NumPy, Pandas, Matplotlib, Streamlit
Frontend : HTML, CSS
Databases : MySQL,SQLite, Firebase
Tools & Platforms : Git, GitHub, VS Code, Jupyter Notebook, Google Collab, Excel, Kaggle
Core Skills : Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)
Soft Skills : Team Management, Project Management, Team Work, Problem Solving, Communication, Debugging

Projects

Crop Recommendation : *GitHub* - *Link* — Feb 2026 – March 2026

- Developed a Crop Recommendation System using Django, implementing user authentication and an admin dashboard for efficient data management.
- Built a machine learning model using the Random Forest Classifier, trained on Kaggle datasets to provide accurate crop predictions based on input conditions.
- **Tech Stack :** *Python, Django, Random Forest Classifier, SQLite, Kaggle, HTML, BootStrap CSS*

Account Spent : *GitHub* - *Link* — Nov 2025 – Jan 2026

- Account Spent is a Streamlit web app that helps users manage their finances by tracking income and expenses in real time.
- It uses Firebase for secure user authentication and cloud data storage via the Realtime Database.
- Users can categorize, add, and reset their income and expenses, and visualize spending patterns through interactive bar charts and also download CSV a report, which makes it easy to review and share financial data.
- **Tech Stack** : *Python, Streamlit, Pandas, Matplotlib, Firebase*

Interactive Data Preprocessing & Visualization : *Github* - *Link* — July 2025 – Sep 2025

- An interactive web app for data preprocessing, visualization, and structured dataset export.
- Implemented CSV/XLSX upload (up to 200MB) with real-time preview and preprocessing features.
- Also statistical visualizations and enabled clean dataset export for analytics and machine learning workflows.
- **Tech Stack** : *Python, Pandas, Streamlit, Matplotlib*

Certificates & Achievements:

• **Smart India Hackathon (SIH) :** Cleared internal round and developed a real-time traffic management system.
• **Monthly Coding Test (MCT) :** Secured 3rd position twice demonstrating strong problem-solving skills.
• **Coding Contest :** Achieved 3rd Position | **Debugging Contest :** Achieved 2nd position, sponsored by Haryana State Council of Science Innovation & Technology **(HSCSIT)**, Panchkula.
